It includes: A reprint of the September 1958 factory Workshop Manual (No.637). The 12-page 'Transmission Appendix' from the December 1957 manual (No.611). The 15-page 1962 'Enclosure to the Shop Manual-Technical Characteristics' (No.854) plus the 1963 and 1964 'Technical

Characteristics' publications for the 1600cc models (27 pages). Introduced in 1954, the initial 750 Series Giulietta was replaced by the 101 Series Giulietta in 1959. Both the 750 and 101 models were powered by a 1300cc (1290cc) engine. The engine capacity was increased in 1962 with the introduction of a 1600cc (1570cc) unit. Co-incident with this engine update, the Giulietta name was changed to Giulia, although they still retained their original 101 Series designation. From 1962 onwards, the updated Giulietta continued to be sold under the Giulia name until they were replaced by the all-new 105 Series Giulia-based models in 1965. As the predominance of the basic mechanical components of the 750 and 101 models remained unchanged during their 1954-1965 production run, the original Giulietta workshop manual was considered adequate and the factory supplemented it with the publication of 'Technical Characteristics' booklets (1963 & 1964) that updated the Factory manual with technical data specific to the 1600cc equipped cars. Timeline of the English language manuals issued by the Alfa factory for the 750 & 101 Series Giulietta and Giulia models: The first English language Workshop Manual (Part No.577 - 600 copies) was issued in May 1957 and it consisted of 14 individual booklets in a ring binder. In addition, a separate booklet numbered 15 was added a little later that was identified as 'Special Repair Data for the 'Sprint Veloce, Spider and Super Spider'. In December 1957, Alfa issued 1000 copies of a softbound workshop manual (Part No.611) that combined the booklets from the May 1957 publication into a single volume. It should be noted that booklet 14 'Special Tools and Equipment' was omitted from this edition and that the images are of poor quality. In September 1958, another 1000 copies of a softbound single volume manual (Part No.637) was issued and the images in this manual are almost photo quality. This edition also included the previously missing 'Special Tools' section. However, for some unknown reason the 12-page appendix to the transmission section from the December 1957 edition was

omitted. This same part number (637) was reprinted by the factory in September 1961 (1000 copies). Finally, in November 1962, Alfa issued 2000 copies of a 15-page booklet 'Enclosure to the Shop Manual - Technical Characteristics' (Part No.854). This booklet expanded the technical data for the 1300cc models that was previously included in 'Technical Specifications' section of both the ring bound and softbound workshop manuals. However, in 1962, the Giulietta sport models: Sprint, Sprint Special and Spider were fitted with the new 1600cc engine and the Giulietta Series 101 name was dropped but they continued to be sold under the Giulia name (as 101 Series vehicles) until they were replaced by the all-new 105 Series Giulia-based models in 1965. Consequently, for the sake of completeness, the 20-page October 1963 'Technical Characteristics' booklet (Part No. 955 -1000 copies) for the 1600cc Giulia Ti, Spider & Sprint and the 7-page October 1964 'Technical Characteristics' for the Giulia Spider Veloce should be a required addition to this list of manuals for the 750 and 101 Series models. Haynes repair manuals are used by the pros, but written for the do-it-yourselfer. 238 pages and more than 600 illustrations and charts, size 8.25 x 10.75 inches. At the time of Floyd Clymer's unexpected demise in 1970, there were a number of manuals that had been completed and were ready for publication; this Honda CB750 is one of those manuals. When the original manual was compiled in either late 1969, or early 1970, it was only applicable to the first series of 1969/70 S.O.H.C. CB750 (Sandcast) and CB750K0

models and minor changes to these early models are noted in the text. However, detailed information on these changes (and subsequent changes) have been updated, by the addition of supplements, that cover the 1971 to 1978 CB750K (K1 K8) series plus the 1975 to 1978 CB750F (F0 F3) models. There were a number of 'running changes' made throughout the 10-year production run of these models and, in order to provide information applicable to those changes, the appropriate supplements are appended to the rear section of this manual. Prior to commencing any work the reader is encouraged to review those supplements with regard to applicable engine number notations as whenever engine numbers are stated, all specifications, maintenance and repair instructions will be specific to that particular series. Beginning in 1968 and extending through the 1975 model year, the 'K' suffix often, but not always, changed on an annual basis. 'K0' was normally used to indicate the first model in the series with updated versions identified as K1, K2, K3 etc. While the 'K' number designations continued in use outside the USA through 1978, in September 1973, American Honda adopted a year identifier within the model number - for example; a CB750K'76 would be a 1976 USA model but in most other countries that same model would be identified as a CB750K6. Setting this potential for confusion aside, we can state that this manual covers the 1969 through 1978 S.O.H.C. CB750K and CB750F models. The CB750 was a true 'superbike' but it was also readily available and reasonably priced. After its initial launch in 1969, the CB750 remained in production (virtually unchanged) through 1978. With a 10-year production run of approximately 450,000 units, no one could have anticipated that it was destined to become a collector's item. Consequently, we are pleased to offer this updated and expanded version of the original Floyd Clymer manual as a service to all 750cc S.O.H.C. Honda owners, enthusiasts and restorers worldwide. Finally, please note that the text in the original manual was translated from

Japanese into English. Consequently, some of the phrasing, grammar, punctuation and word usage may be subtly different from that commonly used in the English language. However the information, as presented, is readily understandable. In addition, while we have done our best to identify any anomalies and errors that may have occurred during the original translation process, we are certain that we will have missed one or two and we request your indulgence in ignoring them. VN700 (U.S.) (1985), VN750 (U.K.) (1985), VN750 (1986-2006) Aside from the odd four-stroke built in their formative years, it wasn't until 1976 that Suzuki manufactured such machines in significant numbers. Until then, it was two-strokes all the way. These models, many of which were the basis of successful racers, carried names like Titan, Cobra, Sebring, LeMans, Kettle, and Water Buffalo along with their codes. The author examines these models and others, providing the reader with: -- Extensive specification tables highlighting the variations in seemingly similar models -- Information to help the reader match model and marketing codes, essential when ordering parts or servicing a machine -- A model chart that matches full codes to their exact year, shows the years in which models were built, and explains the relationship between similar codes Also included is the RE5 with its rotary engine and unique styling, and Suzuki's minute but complex road racers, which carried as many as 14

speeds in their gearboxes. Illustrated throughout with black-and-white photographs of the models and their variants.
