"The sixth edition of Doc 9303, Part 1, updates and replaces the specifications for machine readable passports as published in the fifth edition (2003) and represents a substantial modernization of the material contained in previous editions. In particular, this sixth edition incorporates the new globally interoperable standard for biometric identification of the holder and for the storage of the associated data on a contactless integrated circuit. In consequence, some other biometric identification methods and data storage media, described in the fifth edition, are no longer to be regarded as options within the globally interoperable standard. States may, however, use them for their own or agreed bilateral purposes."--Page iii, v. 1.

In *The Press and Political Culture in Ghana*, Jennifer Hasty looks at the practices of journalism and newsmaking at privately owned and state-operated daily newspapers in Ghana. Hasty decodes the styles and uncovers the strategies that characterize Ghana's major printed news media, focusing on the differences between news generated by the state and news that comes from private sources. Not only are the angles radically different, but so are ways of gathering the news, assigning beats, using sources, and writing articles. For all its differences in presentation, however, Hasty shows that the news in Ghana projects a unified voice that is the result of a contentious and multifarious process that joins Ghanaians in global, national, and local debates. An important engagement with the production of news and news media, this book also explores questions about the relationship of popular culture to state politics, the expression of civic culture, and the role of the media in constituting national and cultural identities. This surprising global history of an indispensable document reveals how the passport has shaped art, thought, and human experience while helping to define the modern world. Narrow escapes and new starts, tearful departures and hopeful arrivals, unwanted scrutiny in the backrooms of officialdom: some of our most memorable experiences involve a passport. In *License to Travel*, Patrick Bixby examines the passports of artists and intellectuals, ancient messengers and modern migrants to reveal how these seemingly humble documents implicate us in larger narratives about identity, mobility, citizenship, and state authority. This concise cultural history takes the reader

on a captivating journey from pharaonic Egypt and Han-dynasty China to the passport controls and crowded refugee camps of today. Along the way, the book connects intimate stories of vulnerability and desire with vivid examples drawn from world cinema, literature, art, philosophy, and politics, highlighting the control that travel documents have over our bodies as we move around the globe. With unexpected discoveries at every turn, License to Travel exposes the passport as both an instrument of personal freedom and a tool of government surveillance powerful enough to define our very humanity. This book begins by looking at career opportunities in both Federal Depository Libraries (FDLs) and non-depository libraries with government documents collections. It then discusses skills and traits; networking and training options; managing and administering people, paperwork, and collections; and both public services and technical services issues. This book has the answers to all questions on what to do to get a visa to any country of your choice and what to do when you get there to avoid becoming illegal or stranded. Most foreign countries will give you a visa if you can provide them with correct and relevant information. And that ' s what most people fail to do—simply from not knowing or not paying attention. By the same token, most foreign embassies will deny applications for failing to meet the requirements, which

is totally ambiguous and can mean anything. This book has been put together with the goal of helping you to understand the process, guide and provide you with the data, information, and insight so you know precisely what is involved and what to do to get the visa you want. It contains all the answers to the questions on what you can do to increase your chances of getting a visa to travel to any country of your choice, including everyone ' s favorite country, the United States of America. This book will provide you with the information and guidelines on the following: —ten easiest ways to travel, immigrate, move to America, Canada, Europe, Australia, other foreign countries, —how to successfully find all the proper, correct, and relevant documents you need to support your visa application to avoid being disqualified, and —how to avoid becoming stranded or an illegal alien in a foreign country. Government websites have all kinds of information on what kind of visa programs are available to be applied for by those seeking to travel overseas. What they don ' t talk about is the most important: how to prepare for visa interviews, what you need to know before submitting a visa application, how to improve your chances of getting a visa to America, Europe, Australia, and other foreign countries. This book has all the answers.
