The story of Tobin Shattuck and his life in the post- Civil War Mountain West, and of his father, who taught him the ways of the wilderness. Concepts embody our knowledge of the kinds of things there are in the world. Tying our past experiences to our present interactions with the environment, they enable us to recognize and understand new objects and events. Concepts are also

relevant to understanding domains such as social situations, personality types, and even artistic styles. Yet like other phenomenologically simple cognitive processes such as walking or understanding speech, concept formation and use are maddeningly complex. Research since the 1970s and the decline of the "classical view" of concepts have greatly illuminated the psychology of concepts. But persistent theoretical disputes have sometimes obscured this progress. The Big Book of Concepts goes beyond those disputes to reveal the advances that have been made, focusing on the major empirical discoveries. By reviewing and evaluating research on diverse topics such as category learning, word meaning, conceptual development in infants and children, and the basic level of categorization, the book develops a much broader range of criteria than is usual for evaluating theories of concepts.

The World Bank Group promotes small and medium enterprise (SME) growth through both systemic and targeted interventions. Targeting means focusing benefits on one size-class of firms to the exclusion of others. Targeted support for SMEs is a big business for the World Bank Group, averaging around \$3 billion a year in commitments, expenditures, and gross exposure over the 2006-12 period. In the context of broader reforms, such targeted support can be a powerful tool. Targeting SMEs is not an end in itself, but a means to create economies that can employ more people and create more opportunity for citizens to achieve prosperity. A thriving and growing SME sector is associated with rapidly growing economies. A central challenge is to level the economic playing field by ensuring dynamic markets; strengthening market-support institutions; and removing constraints to participation. IEG found that financial sector development can have both a pro-growth and pro-poor impact by alleviating SMEs' financing constraints, enabling new entry of firms and entrepreneurs and better resource allocation. Layered on top of this are targeted forms of assistance; these interventions may build on a foundation of more systemic

reforms, may come in tandem with them, or may in fact be a means to build systemic reforms from the bottom up. Any credible justification of targeted support to SMEs must be focused on establishing well-functioning markets and institutions, not simply providing a temporary supply of benefits to a small group of firms during a project's lifespan. Thus, targeted interventions need to leverage resources to produce broader benefits for institutions and markets. To make targeted support for SMEs more effective, the World Bank Group needs to do several things: Clarify its approach to targeted support to SMEs; Enhance the support's relevance and additionality; Institute a tailored research agenda; Strengthen guidance and quality control for such support; Reform MIGA's Small Investment Program.

A collection of unusual facts, games, puzzles, activities, and artwork centering around the world of insects. At first, film was a waking dream, the gift of appearance delivered to huddled masses sitting in the dark. Then movies began transforming our society and our perception of the world. Now, although still richly entertaining, do they still have the same power? What have they done to our lives? In *The Big Screen* David Thomson, one of film's greatest living experts, tells the enthralling story of the movies, and how they have shaped us. Thomson takes us around the globe, through time, and across many media to tell the complex, gripping, paradoxical story of the movies. He tracks the ways in which we were initially enchanted by this mesmerizing imitation of life and let movies - the stories, the stars, the look - show us how to live. But at the same time movies, offering a seductive escape from the everyday reality and its responsibilities, have made it possible for us to evade life altogether. The entranced audience has become a model for powerless citizens trying to pursue happiness by sitting quietly in a dark room. Does the big screen take us out into the world, or merely mesmerize us? That is Thomson's question in this great adventure of a book. This passionate feat of storytelling is vital to anyone trying to make sense of the age of

screens - the age that, more than ever, we are living in. If your friend has a secret, you want to know what it is, right? But when Charlie learns Ford's big secret, he's shocked. It was first published in 1990 to fulfill a long-felt need within the Fellowship for a collection of reflections that moves through the calendar year--one day at a time. Each page contains a reflection on a quotation from A.A. Conference-approved literature, such as Alcoholics Anonymous, Twelve Steps and Twelve Traditions, As Bill Sees It and other books. These reflections were submitted by members of the A.A. Fellowship who were not professional writers, nor did they speak for A.A. but only for themselves, from their own experiences in sobriety. Thus the book offers sharing, day by day, from a broad cross section of members, which focuses on the Three Legacies of Alcoholics Anonymous: Recovery, Unity and Service. Daily Reflections has proved to be a popular book that aids individuals in their practice of daily meditation and provides inspiration to group discussions even as it presents an introduction for some to A.A. literature as a whole.
