Franchise Mar 09 2021 This collection explores how
creators extend the commercial life of their creative
endeavours, and the impact of these legal
developments.***

***The Gospel According to Matthew Jan 19 2022 The
publication of the King James version of the Bible,
translated between 1603 and 1611, coincided with an
extraordinary flowering of English literature and is
universally acknowledged as the greatest influence
on English-language literature in history. Now, world-
class literary writers introduce the book of the King
James Bible in a series of beautifully designed,
small-format volumes. The introducers' passionate,
provocative, and personal engagements with the
spirituality and the language of the text make the
Bible come alive as a stunning work of literature and
remind us of its overwhelming contemporary
relevance.***

Governing Law and Dispute Resolution in the Oil

and Gas Industry Nov 04 2020 The oil and gas industry's wide international exposure and constantly changing landscape leave it particularly vulnerable to disputes. As this practical book demonstrates, the risks associated with disputes can be mitigated by parties utilising governing law and dispute resolution clauses in contractual agreements within the sector. Examining a global range of jurisdictions, the book offers clear guidance on the most appropriate choice of law and choice of dispute resolution forum for oil and gas contracts, analysing the key issues and defining the legal contours involved.

Para Español Oprimida #2 Jun 11 2021 As a Rideshare Driver, waiting for somebody to show on the App, I had plenty of time to meditate about important subjects that has been difficult to solve since the beginnings of Humanity, like for example: Who was first?, The Egg or the Hen?. After years of discussion, research and study, I've come to the conclusion that nobody knows and nobody will, determine WHO IS IMMIGRANT OR NATIONAL, since the Evolution Theory comes with the cell growing and evolving from it through Earlier Apes (Nakalipithecus), Ouranopithecus (Gorilla Split) , Sahelanthropus (Possibly Bipedal), Orrorin (Chimpanzee Split), in the Hominini Stage Miocene

Age, then the Homo Habilis Stage of the Pliocene Age including the Ardipithecus & Australopithecus (Earliest Bipedal and use of Stone Tools), and the Pleistocene Age starting with the Homo Erectus (Exit from Africa and Earliest fire use), following the Homo Heidelbergensis (Earliest Clothes and Cooking), the Neanderthals and the Homo sapiens which characterize as Modern Humans/Speech, as published on Wikipedia; some religions still believe that there is a God who created a Man, then took out his rib and made a Woman, in some place (With unknown coordinates) named Eden, then the Woman ate an apple a snake gave her and then they both were kicked out from that place and sent somewhere else, even if I believe this theory, who can answer me who is the IMMIGRANT, if they then began to populate our Planet with their descendants?. These days, sales of tiki torches and white bedding sets skyrocketed thanks to Radical Nationalist nerves stimulated by Leaders and small groups around the US and other "developed" countries on East, West, North and South, setting the public stage to the spread of hate speech and crimes. But, is that bad to be here and speak other language, be fat - non white and ugly (like me)?, How does the US thrive with a population of 329,758,344 humans and around 350 languages spoken in its territory?

The Politics of Contemporary Spain Aug 14 2021
While Spain is now a well-established democracy closely integrated into the European Union, it has suffered from a number of severe internal problems such as corruption, discord between state and regional nationalism, and separatist terrorism. The Politics of Contemporary Spain charts the trajectory of Spanish politics from the transition to democracy through to the present day, including the aftermath of the Madrid bombings of March 2004 and the elections that followed three days later. It offers new insights on the main political parties and the political system, on the monarchy, corruption, terrorism, regional and conservative nationalism, and on Spain's policies in the Mediterranean and the EU. It challenges many existing assumptions about politics in Spain, reaching beyond systems and practices to look at identities, political cultures and mentalities. It brings to bear on the analysis the latest empirical data and theoretical perspectives.

redELE nº 24. Revista electrónica de didáctica de español como lengua extranjera Aug 26 2022

Espanol Para la Vida 1 - Workbook Jan 31 2023 Part of a four-book course which develops students' awareness of cultural differences and similarities while they learn to listen to, understand, speak and write Spanish. The new edition has increased use of authentic material, a greater emphasis on developing communicative competence and the inclusion of fun activities. In addition, there is strong adherence to sound grammatical accuracy and vocabulary building, both of which help develop student proficiency in preparation for their CXC Basic- and General-level examinations.

***The Ambiguity of Teaching to the Test Mar 01 2023
Testing is one of the most controversial of all state and federal educational policies. The effects of testing are quite ambiguous. The same test may lead to different consequences in different circumstances, and teachers may use very different strategies to prepare students for tests. Although most experts agree that mandatory testing leads to teaching to the test, they disagree about whether it leads to meaningless drill, wasted time, de-professionalizing teachers, and demotivating students, or to more challenging and thoughtful curricula, more engaging teaching, increased student motivation, and increased accountability. To help sort through this ambiguity and provide a firmer***

basis for decisions, The Ambiguity of Teaching to the Test: Standards, Assessment, and Educational Reform offers a hard look at the effects of state testing, and thoroughly examines the ambiguity of test preparation and how test preparation practices are influenced by what teachers know and the leadership coming from the school and district. Drawing on data from a three-year study of New Jersey's testing policy in elementary mathematics and science, it helps to explain the variety of ways that teachers modify their teaching in response to state tests, raises important questions, and offers useful guidance on how state policymakers and local and district school administrators can implement policies that will improve educational equity and performance for all students. It also offers an in-depth analysis of classroom practices that should inform teachers and teacher educators whose goal is to meaningfully implement conceptually based teaching practices. This comprehensive look at the statewide variation in testing practice features: *a data-based, non-ideological treatment of how testing affects teachers, in a field characterized by ideologically driven beliefs and by anecdotes; *an extensive and well-integrated combination of qualitative and quantitative data sources that provide a statewide

overview, as well as an in-depth analysis of teachers and classrooms; *a careful analysis of the variety of forms of teaching to the test; and *a multilevel exploration of how a variety of personal and leadership factors can influence teaching to the test. This is an important book for researchers, professionals, and students in educational testing, educational policy, educational administration, mathematics and science education, educational reform, and the politics and sociology of education. It will also prove useful for state policymakers, school and district leaders, and teacher educators and curriculum specialists who are making decisions about how to design and respond to new testing systems.

Reparative Citizenship for Sephardi Descendants
Oct 28 2022 In 2015, both Portugal and Spain passed laws enabling descendants of Sephardi Jews to obtain citizenship, an historic offer of reconciliation for Jews who were forced to undergo conversions or expelled from Iberia nearly half a millennia ago.

Drawing on the memory of the expulsion from Sepharad, the scholarly and personal essays in Reparative Citizenship for Sephardi Descendants analyze the impact of reconciliation laws on descendants and contemporary forms of citizenship.

The Communist Quest for National Legitimacy in Europe, 1918-1989 Apr 09 2021 There are two popular myths concerning the relationship between communism and nationalism. The first is that nationalism and communism are wholly antagonistic and mutually exclusive. The second is the assertion that in communist Eastern Europe nationalism was oppressed before 1989, to emerge triumphant after the Berlin Wall came down. Reality was different. Certainly from 1945 onwards, communist parties presented themselves as heirs to national traditions and guardians of national interests. The communist states of Central and Eastern Europe constructed

"socialist patriotism," a form of loyalty to their own state of workers and peasants. Up to 1989, communists in Eastern Europe sang the national anthem, and waved the national flag next to the red banner. The use of national images was not the exception, but the rule. From Cuba to Korea, all communist parties attempted to gain national legitimacy. This was not incidental or a deviation from Marxist orthodoxy, but ingrained in the theory and practice of the communist movement since its inception. The study of communist national legitimacy is an exciting new field. This book presents examples of communist attempts to co-opt nationalism from both sides of the iron curtain and lays bare the striking similarities between such diverse cases as the socialist patriotism of the Bulgarian Communist Party and the national line of the Portuguese communists, between Romanian communist nation building and the national ideology of the Spanish Communist Party. This book was published as a special issue of Nationalities Papers. Recent Advances in Parkinson's Disease Apr 02 2023 Recent Advances in Parkinson ?s Disease Research, Volume 252, represents a follow-up on two previous volumes presented in the Progress in Brain Research series, Volumes 193 and 193, both published in 2010. It contains a collection of

overview articles written by leading researchers in Parkinson's, discussing the most important advances made in basic, translational and clinical research. Topics of note in this new release include What can we learn from iPS cell models of PD, What can we learn from animal models of PD?, Molecular basis of selective neuronal vulnerability in PD, Role of innate and adaptive immunity in Parkinson ?s disease, and much more. Covers all key aspects of current research on Parkinson ?s disease Includes topics that range from basic studies on disease models and pathogenic pathways (e.g., protein misfolding, immune and glial mechanisms) to clinical studies on disease features, microbiome, pathophysiology and therapeutic approaches Presents articles authored by world leaders in their respective fields

Romanesque Architecture and Its Sculptural Decoration in Christian Spain, 1000-1120 Jul 01 2020 Mann examines how the financial patronage of newly empowered local rulers allowed Romanesque architecture and sculptural decoration to significantly redefine the cultural identities of those who lived in the frontier kingdoms of Christian Spain.

Handbook of Magnetic Materials Apr 29 2020 Volume 20 of the Handbook of Magnetic Materials,

as the preceding volumes, has a dual purpose. As a textbook it is intended to help those who wish to be introduced to a given topic in the field of magnetism without the need to read the vast amount of literature published. As a work of reference it is intended for scientists active in magnetism research. To this dual purpose, Volume 20 is composed of topical review articles written by leading authorities. In each of these articles an extensive description is given in graphical as well as in tabular form, much emphasis being placed on the discussion of the experimental material in the framework of physics, chemistry and material science. It provides readers with novel trends and achievements in magnetism. Composed of topical review articles written by leading authorities Intended to be of assistance to those who wish to be introduced to a given topic in the field of magnetism As a work of reference it is intended for scientists active in magnetism research Provide the readership with novel trends and achievements in magnetism Idlewild Español: Conversational Spanish (eBook with clickable audio, grammar notes, and 1400 illustrated scenarios) May 23 2022 This unique and delightful e-book from one of New York City's top language schools will teach you Spanish in the easiest, most effective way possible—by combining

illustrations of everyday situations with Spanish text and clickable audio. There are no separate audio files or apps to download. Simply click on the images on each page to hear the captions and dialogue spoken by native speakers and repeat what you hear. The emphasis on conversational Spanish, broken down into common phrases and lexical chunks, will teach you to speak and understand Spanish as it is actually spoken, and you'll pick up grammar and syntax naturally without even realizing it. This immersive textbook is ideal for self study or the classroom, for beginner to intermediate students, and includes: * More than 1400 illustrated scenarios accompanied by captions and dialogue in colloquial Spanish; * Over 200 essential Spanish verbs, with illustrated examples and simple tables covering 11 tenses and moods; * Special thematic sections on 20 topics including food, family, work and travel; and * Links to 100 grammar and usage notes that explain the concepts demonstrated in each section. (But if you read the illustrated pages on your own a few times, you may not need them!) Idlewild's method is based on the latest research on language acquisition and more than a decade of experience teaching group classes in New York City and online. Idlewild's classes have been named "Best of New York" by New York Magazine and have

been recommended by The New Yorker, Time Out, Vox and Condé Nast Traveler, among others.

El cacao Guayaquil en nueva España, 1774-1812 (política imperial, mercado y consumo) Nov 28 2022
Esta obra analiza la presencia del cacao originado en las costas del Guayas (Ecuador) conocido en el mercado mundial como cacao guayaquil. El estudio se centra en el intercambio comercial con Nueva España y los vericuetos de la prohibición comercial entre colonias. Muestra, por una parte, el carácter imperialista de la corona que gobernó sus posesiones del Nuevo Mundo como colonias más que como reinos en el aspecto económico, aunque una de las primeras cosas que el tráfico del cacao puso en evidencia es que la prohibición de la Corona del siglo XVII no detuvo la exportación de cacao, aunque sí frenó el crecimiento de Guayaquil. Por otra parte, la investigación establece el tráfico naviero, los montos de las cargas de cacao que arribaron a Acapulco y las manifestaciones de los precios en el mercado de la ciudad de México y trata de demostrar que la oferta creciente de cacao guayaquil, ayudó a mantener los precios estables en un contexto general de crecimiento de los precios en la segunda parte del siglo XVIII.

New Challenges in Computational Collective Intelligence Jun 23 2022 Collective intelligence has become one of major research issues studied by today's and future computer science. Computational collective intelligence is understood as this form of group intellectual activity that emerges from collaboration and competition of many artificial individuals. Robotics, artificial intelligence, artificial cognition and group working try to create efficient models for collective intelligence in which it emerges from sets of actions carried out by more or less intelligent individuals. The major methodological, theoretical and practical aspects underlying computational collective intelligence are group decision making, collective action coordination, collective competition and knowledge description, transfer and integration. Obviously, the application of multiple computational technologies such as fuzzy systems, evolutionary computation, neural systems, consensus theory, knowledge representation etc. is necessary to create new forms of computational collective intelligence and support existing ones. Three subfields of application of computational technologies to support forms of collective intelligence are of special attention to us. The first one is semantic web treated as an advanced tool that increases the collective

intelligence in networking environments. The second one covers social networks modeling and analysis, where social networks are this area of in which various forms of computational collective intelligence emerges in a natural way. The third subfield relates us to agent and mul- agent systems understood as this computational and modeling paradigm which is especially tailored to capture the nature of computational collective intelligence in populations of autonomous individuals.
