*Once in a Lifetime: the Incredible Story of the New York Cosmos* Mar 25 2020 The “compelling . . . detailed and thoughtful account” of the rise and fall of the Cosmos, New York's first superstar soccer team (Kirkus Reviews). In the summer of 1977, soccer was poised to finally conquer America and the New York Cosmos were the premier sports team of the city. They boasted the greatest roster of the world's best players—notably, Brazil's international sensation Pelé—ever assembled for any sport. For a time, they were the darlings of the press. Their first game was televised in twenty-two different countries. They were favorites at Studio 54. They partied behind the velvet ropes with Andy Warhol and Mick Jagger. Less a growing

sports phenom than a pop-culture happening, the hottest ticket in town drew the likes of Steven Spielberg, Barbra Streisand, Henry Kissinger, and Robert Redford. Warner Brothers chairman and Cosmos owner Steve Ross may not have known a goalkeeper from a zookeeper, but in a city awash in celebrity and decadence, Ross knew spectacle. He also knew how to make a dollar, and stars. But as the Cosmos players soon became enmeshed in a world of millionaires, gangsters, groupies, glamour, power struggles, alcoholic excess, drugs, disco and very public fistfights, they were set for a heartbreaking and inevitable fall. “Colorful and keen . . . [and] detail-rich, this unlikely drama of a quintessentially American flirtation” (Publishers Weekly), “is a gripping evocation of a glorious but brief moment when the beautiful game had the US entranced” (Time Out London).

*Survivor on the River Kwai* May 20 2022 Survivor on the River Kwai is the heartbreaking story of Reg Twigg, one of the last men standing from a forgotten war. Called up in 1940, Reg expected to be fighting Germans. Instead, he found himself caught up in the worst military defeat in modern British history - the fall of Singapore to the Japanese. What followed were three years of hell, moving from one camp to another along the Kwai river, building the infamous Burma railway for the all-conquering Japanese Imperial Army. Some prisoners coped with the endless brutality of the code of Bushido by turning to God; others clung to whatever was left of the regimental structure. Reg made the deadly jungle, with its malaria, cholera, swollen rivers, lethal snakes and exhausting heat, work for him. With an ingenuity that is astonishing, he trapped and ate lizards, harvested pumpkins from the canteen rubbish heap and with his homemade razor became camp barber. That Reg survived is testimony to his own courage and determination, his will to beat the alien brutality of camp guards who had nothing but contempt for him and his fellow POWs. He was a risk taker whose survival strategies sometimes bordered on genius. Reg's story is unique. Reg Twigg was born at Wigston (Leicester) barracks on 16 December 1913. He was called up to the Leicestershire Regiment in 1940 but instead of fighting Hitler he was sent to the Far East, stationed at Singapore.

When captured by the Japanese, he decided he would do everything to survive. After his repatriation from the Far East, Reg returned to Leicester. With his family he returned to Thailand in 2006, and revisited the sites of the POW camps. Reg died in 2013, at the age of ninety-nine, two weeks before the publication of this book.

**Tip of the Spear** Dec 03 2020 The inspiring true story of a US Special Forces soldier who was medically retired after stepping on an IED, and his incredible return to active duty. Sergeant First Class (SFC) Ryan Hendrickson is a brave, determined, and courageous soldier -- a Green Beret clearing the way for his twelve-man team while conducting combat operations against the Taliban. As the "tip of the spear," his role is to ensure the route taken by U.S. and Afghan troops are free of IEDs -- improvised explosive devices. Many soldiers do not survive their last step; those who do often lose at least one limb. While rescuing an Afghan soldier outside a mud-hut compound in 2010 -- knowing that he was in "uncleared" territory -- Ryan stepped on an IED with his right foot. The device exploded, leaving his foot dangling at the end of his leg. American soldiers losing a limb is an all-too-common occurrence. But what makes Ryan's story different is that after undergoing two dozen surgeries and a tortuous rehabilitation, he was medically retired but fought to return to active duty. Multiple skin grafts to his leg and right foot successfully reattached his lower leg, and he was aided in his recovery by wearing a new prosthetic device known as an IDEO (Intrepid Dynamic Exoskeletal Orthosis). Once he passed a series of crucial physical tests, Ryan was able to rejoin the Green Berets within a year and physically perform his duties, redeploying to Afghanistan in March 2012. In 2016, he volunteered to return to Afghanistan with Bravo Company, 2nd Battalion, 7th Special Forces Group. During a firefight with the Taliban, he risked his life under heavy enemy fire to rescue three Afghan soldiers cut off from friendly forces and return the bodies of two dead Afghan soldiers under the ethos that "no one gets left behind." For his heroic efforts on the battlefield, SFC Ryan Hendrickson was awarded a Silver Star, the nation's third-highest award for valor. An engaging and harrowing account, Tip of the Spear tells the amazing story of one Green Beret's indomitable spirit.

**Soil** Jul 10 2021 What we do to the soil, we do to ourselves. Soil is the unlikely story of our most maligned resource as swashbuckling hero. A saga of bombs, ice ages and civilisations falling. Of ancient hunger, modern sicknesses and gastronomic delight. It features poison gas, climate collapse and a mind-blowing explanation of how rain is formed. For too long, we've not only neglected the land beneath us, we've squandered and debased it, by over-clearing, over-grazing and over-ploughing. But if we want our food to nourish us, and to ensure our planet's long-term health, we need to understand how soil works - how it's made, how it's lost, and how it can be repaired. In this ode to the thin veneer of Earth that gifts us life,

commentator and farmer Matthew Evans shows us that what we do in our backyards, on our farms, and what we put on our dinner tables really matters, and can be a source of hope. Isn't it time we stopped treating the ground beneath our feet like dirt?

Vann Woodward recreates the gripping account of the battle for Leyte Gulf—the greatest naval battle of World War II and the largest engagement ever fought on the high seas. **Nature Wars** Dec 27 2022 This may be hard to believe but it is very likely that more people live in closer proximity to more wild animals, birds and trees in the eastern United States today than anywhere on the planet at any time in history. For nature lovers, this should be wonderful news -- unless, perhaps, you are one of more than 4,000 drivers who will hit a deer today, your child's soccer field is carpeted with goose droppings, coyotes are killing your pets, the neighbor's cat has turned your bird feeder into a fast-food outlet, wild turkeys have eaten your newly-planted seed corn, beavers have flooded your driveway, or bears are looting your garbage cans. For 400 years, explorers, traders, and settlers plundered North American wildlife and forests in an escalating rampage that culminated in the late 19th century's "era of extermination." By 1900, populations of many wild animals and birds had been reduced to isolated remnants or threatened with extinction, and worry mounted that we were running out of trees. Then, in the 20th century, an incredible turnaround took place. Conservationists outlawed commercial hunting, created wildlife sanctuaries, transplanted isolated species to restored habitats and imposed regulations on hunters and trappers. Over decades, they slowly nursed many wild populations back to health. But after the Second World War something happened that conservationists hadn't foreseen: sprawl. People moved first into suburbs on urban edges, and then kept moving out across a landscape once occupied by family farms. By 2000, a majority of Americans lived in neither cities nor country but in that vast in-between. Much of sprawl has plenty of trees and its human residents offer up more and better amenities than many wild creatures can find in the wild: plenty of food, water, hiding places, and protection from predators with guns. The result is a mix of people and wildlife that should be an animal-lover's dream-come-true but often turns into a sprawl-dweller's nightmare. *Nature Wars* offers an eye-opening look at how Americans lost touch with the natural landscape, spending 90 percent of their time indoors where nature arrives via television, films and digital screens in which wild creatures often behave like people or cuddly pets. All the while our well-meaning efforts to protect animals allowed wild populations to burgeon out of control, causing damage costing billions, degrading ecosystems, and touching off disputes that polarized communities, setting neighbor against neighbor. Deeply researched, eloquently written, counterintuitive and often humorous *Nature Wars* will be the definitive book on how we created this unintended mess.

In this in-depth, warts-and-all biography, die-hard fan Aubrey Malone examines White's background, his illiteracy, drinking and tempestuous relationship with his wife Maureen, set against his incredible rise to the top in snooker's halcyon days of the 1980s. There are tales of Jimmy using a walking stick to make a century break at his local snooker hall, his battles with the twin demons of drink and the yips, and how he nearly lost the world trophy, despite never having won it! **Monsieur X** Sep 23 2022 Monsieur X is a dazzling tale of glamour, riches, violence and ultimately tragedy. Patrice des Moutis was a handsome, charming and well-educated Frenchman with an aristocratic family, a respectable insurance business, and a warm welcome in the smartest Parisian salons. He was also a compulsive gambler and illegal bookie. Between the late 1950s and the early 1970s, Des Moutis made a daring attempt to beat the French state-run betting system. His success so alarmed the authorities that they repeatedly changed the rules of betting in an effort to stop him. And so a battle of wills began, all played out on the front pages of the daily newspapers as the general public willed Des Moutis on to ever greater triumphs. He remained one step ahead of the law until finally the government criminalised his activities, driving him into the arms of the underworld. Eventually the net began to close, high-profile characters found themselves the target of the state's investigation, and people began turning up dead.

The Byerley Turk Dec 15 2021 Of the three horses that were the ancestors of the modern thoroughbred, the first and greatest was undoubtedly the Byerley Turk. This book gives an account of the life of this breed, extending from the palaces of the Ottoman Empire to the streets of London and beyond, and featuring a cast of historical figures. It begins in 1679 in a remote Balkan village, where a seyis - a penniless groom - finds himself caring for a remarkable young foal. Believing it destined for greatness, and seeing a chance to escape his own humble circumstances, he begins schooling the animal in the disciplines of war. Hewing closely to the historical record, the author goes on to trace the fortunes of the Turk and its new master: In 1682, they arrived in Istanbul, where the horse was selected for the Ottoman Empire's renowned cavalry. Ridden as a battle charger in the Turkish sieges on Vienna and Buda, it was captured, along with its groom, by a party of adventuring British aristocrats and taken back to England in 1686. In London, it was bought by Captain Robert Byerley, who rode the Turk to Ireland to take on the Jacobite forces in several pivotal encounters, including the Battle of the Boyne. Eventually, the Turk was put to stud, initiating what was to become its greatest legacy: first foundation sire of the thoroughbred line.--Publisher's description.
