*Course Design Strategy* Apr 05 2021 This book is packed with strategies and insights that will help you design better training courses. It focuses on how people learn as the key factor in making design decisions. The book shows you how to design a good course for any field, no matter what medium you use to deliver it. Learn how the brain works, how people forget, how to gain and maintain attention and how to make a subject interesting. Then use the easy-to-follow guidelines to design strategically by increasing curiosity, making content emotional, making learners practise what they have learned and using failure as a teaching tool. The art of designing a course and making people learn is mastered through practical experience of running courses; the science is gained by evidence-based research on how people learn. The book combines the two, offering many examples and studies in cognitive psychology, neuroscience, instructional design and training the trainer. You will find lots of examples and studies in the book that provide insights that may not be obvious but that lead to important design decisions. They will change forever how you think about training design and delivery and help you design courses that your learners will love. In *Course Design Strategy*, you will learn:

- How to make content memorable
- What learners expect from a course
- How people learn and forget, and why this should be the cornerstone of any course design
- How to use eureka moments and eureka concepts as the building blocks of course design
- How to make content easy to learn
- Why the presence of a feedback loop is crucial to learning
- How to use exercises and tests to enhance learning

**Training Strategies for Crisis and Hostage Negotiations** Dec 13 2021 Training Strategies for Crisis and Hostage Negotiations was written for trainers who are tasked with providing role play: scenario-driven training that is challenging, novel, interesting, varied, and motivating. A trainer may play a larger role as leader, expert, teacher, coordinator, planner, facilitator, resource manager/librarian, observer/evaluator, talent agent/developer, and as a liaison with local, regional, and national groups. Role play remains the principal resource as the most effective way to train negotiators. Both novice and experienced scenarios can be written in any number of ways, with role plays having endless possible variations that provide needed practice under controlled circumstances. Role play has been employed in numerous and diverse settings in the behavioral sciences, government, military, medicine, and business, affording needed practice under these controlled circumstances. The book observes training plans, goals and objectives, roles of trainers, scenario writing, subjects and realistic guidelines for role players, creative variations for role play practice, plus feedback and evaluation. The author adds knowledge about constructing scenarios that teach and challenge, making role plays more powerful and enlivening. Foundation material is included about the role of the trainer, the trainee, adult learning, and the important process of evaluation and the creative use of role play. In addition to the basic principles and mechanics of training strategies, skill-building exercises are presented, which can be used to serve unique settings and circumstances. The basics of active listening skills, negotiations stratagems, analysis of personality, and training

techniques to properly master the basic skills for negotiators at all levels are among the many facets of this resource. The author presents a constant review and application of fundamentals in the negotiation world that has produced successful resolutions and competent, skilled negotiators. For the trainer, negotiator, supervisor, or academy instructor, this manual will be an invaluable training source."

**Of Course I Love You... Now Go to Your Room!** Jan 22 2020 Top family therapist Diane Levy gives clear parenting guidelines in this bestselling title. This book presents a modern approach to parenting. Diane Levy believes children must be taught to experience and handle their emotions and they must learn self-discipline. She also believes that it takes about twenty years to raise a child. Within that twenty years, you will have taught - or led your child towards the teaching of all the skills they will need to function in the world away from home. Levy's approach to parenting has two main tenets: Emotional Support and Limit Setting. The first responsibility of parents is to give children emotional support so that they will have the courage to have the experiences and do the learning that they need to become emotionally independent adults. The second responsibility is to set suitable boundaries and expectations so that they can safely tread the path from undisciplined babies to self-disciplined adults. Diane Levy uses her approach to parenting in the context of modern society. In many families both parents work, and many parents work and raise children single-handedly; in order to establish a good family structure clear boundaries must exist between parent and child. She discusses specific issues, such as sibling rivalry, bullying and nasty habits. Readers may dip into the book to find immediate help for problems with sleeping, eating and toilet training. Sex education and strategies for coping with teenagers are also covered; with the last part of the book summing up simple parenting strategies.

*Creating Courses Online* Feb 27 2023 Discover How to Create Highly Profitable Online Courses in Just 6 Easy Steps. Do you have a skill or certain knowledge that you'd like to share with the world and make a great profit out of it? In the past few years, and especially during and after the Coronavirus pandemic, the E-learning market has taken over the Internet. Experts predict that by 2025, this particular market will be worth over \$300 billion, and unless the Internet ceases to exist, it will only continue to grow. Unlike other online businesses, you don't need to possess a certain set of skills to jump on this wagon--you just need one. It can be literally anything, from drawing or sewing to SEO optimization and marketing. You can earn money online by simply knowing how to speak your language because chances are that someone, somewhere in the world, wants to learn it. And that's the beauty of online teaching--your audience is the whole world. No matter which skill you have, there are people who want you to share it with them. And they are willing to pay you good money for it. But beware: the fact that there's a buyer for whatever you want to sell means there's almost certainly someone who's already selling it. That's the thing with online teaching--it's profitable, but competitive. Easy, but crowded. That's why you need to arm yourself with the proper

knowledge on how to choose, create, and market the absolute best online course. It's not enough to simply be an expert on a specific subject. In the jungle of online courses, you need to know how to fight for survival. In *Creating Online Courses*, you'll discover: 6 incredibly simple steps for creating a killer online course from scratch Bulletproof marketing strategies that work like a charm and will crush your competition Tactics for choosing the most profitable niche and topics for building your online course, even if you don't have a clear idea of which direction you want to go in The best E-learning platforms to choose from based on your personal preferences and niche How to use social media to promote your course and have it stand out in the market within just a few weeks after launch Straightforward guidance on how best to organize the content of your course to help you attract a broad audience Pricing strategies that will enable you to work less for more money (Hello, vacation!) Common beginner's mistakes to avoid, allowing you to streamline the process and get ever-closer to achieving your online business goals And much more. Even if you've never considered creating and teaching an online course, but the idea now piques your interest, this simplified instruction manual will eliminate any guesswork throughout the way. For those of you who have already tried their luck on the market yet failed to see the results you had hoped, you'll be able to figure out exactly what you've been doing wrong all along... Matt, a first year General Chemistry student at the University of Utah, scored 65% and 55% on his first two exams and 95% on his third—These are representative of thousands of students who decisively improved their grades by acting on the advice described in this book. What is preventing your students from performing according to expectations? Sandra McGuire offers a simple but profound answer: If you teach students how to learn and give them simple, straightforward strategies to use, they can significantly increase their learning and performance. For over a decade Sandra McGuire has been acclaimed for her presentations and workshops on metacognition and student learning because the tools and strategies she shares have enabled faculty to facilitate dramatic improvements in student learning and success. This book encapsulates the model and ideas she has developed in the past fifteen years, ideas that are being adopted by an increasing number of faculty with considerable effect. The methods she proposes do not require restructuring courses or an inordinate amount of time to teach. They can often be accomplished in a single session, transforming students from memorizers and regurgitators to students who begin to think critically and take responsibility for their own learning. Sandra

McGuire takes the reader sequentially through the ideas and strategies that students need to understand and implement. First, she demonstrates how introducing students to metacognition and Bloom's Taxonomy reveals to them the importance of understanding how they learn and provides the lens through which they can view learning activities and measure their intellectual growth. Next, she presents a specific study system that can quickly empower students to maximize their learning. Then, she addresses the importance of dealing with emotion, attitudes, and motivation by suggesting ways to change students' mindsets about ability and by providing a range of strategies to boost motivation and learning; finally, she offers guidance to faculty on partnering with campus learning centers. She pays particular attention to academically unprepared students, noting that the strategies she offers for this particular population are equally beneficial for all students. While stressing that there are many ways to teach effectively, and that readers can be flexible in picking and choosing among the strategies she presents, Sandra McGuire offers the reader a step-by-step process for delivering the key messages of the book to students in as little as 50 minutes. Free online supplements provide three slide sets and a sample video lecture. This book is written primarily for faculty but will be equally useful for TAs, tutors, and learning center professionals. For readers with no background in education or cognitive psychology, the book avoids jargon and esoteric theory.
