Proceedings of the 11th Italian National Congress on Superconductivity (SATT 11) Jun 09 2021

Smart and Innovative Trends in Next Generation Computing Technologies Oct 26 2022 The two-volume set CCIS 827 and 828 constitutes the thoroughly refereed proceedings of the Third International Conference on Next Generation Computing Technologies, NGCT 2017, held in Dehradun, India, in October 2017. The 135 full papers presented were carefully reviewed and selected from 948 submissions. There were organized in topical sections named: Smart and Innovative Trends in Communication Protocols and Standards; Smart and Innovative Trends in Computational Intelligence and Data Science; Smart and Innovative Trends in Image Processing and Machine Vision; Smart Innovative Trends in Natural Language Processing for Indian Languages; Smart Innovative Trends in Security and Privacy.

Directory of Research in Physics/astronomy at Primarily Undergraduate Institutions Dec 16 2021 To increase faculty participation and to recognize the strategic educational position held by undergraduate research, scholarship, and creative activities (URSCA) in many institutions, faculty mentorship of undergraduate students needs to be valued as a standard component of workload and formally included in activity reports and evaluations, including those that lead to reappointment, tenure, and promotion. This white paper presents the need for recognition of faculty mentorship of URSCA, recommends best practices for institutions to adopt, offers a selection of case studies where some of these practices are already established, and summarizes the challenges ahead.

Directory of Physics, Astronomy & Geophysics Staff 1997 Apr 27 2020 Here is the most complete directory of

physics organizations in the United States -- professional, degree-granting, and research. It is a veritable "Who's Who" of institutions and individuals in the physical sciences. Listed are: - North American academic institutions and departments granting degrees in physics and related fields - Industrial research-and-development centers, small R&D companies, consulting Firms, and professional practices - Federally funded R&D centers and government agencies - University-affiliated and other research institutes - Hospitals, medical schools, and other institutions Department staff listings, with individual addresses and e-mail, are provided. The DIRECTORY also contains the most complete listing of physical sciences professional societies throughout the world, with approximately twice as many verified entries as any other directory.

Black Churches in Texas Apr 19 2022 In this book, the author catalogues 375 black congregations, each at least one hundred years old, in the parts of Texas where most blacks were likely to have settled -- east of Interstate Highway 35 and from the Red River to the Gulf of Mexico. Ninety-nine counties are divided into five regions: Central Texas, East Texas, the Gulf Coast, North Texas, and South Texas.

Energy Research Abstracts Jan 05 2021 Semiannual, with semiannual and annual indexes. References to all scientific and technical literature coming from DOE, its laboratories, energy centers, and contractors. Includes all works deriving from DOE, other related government-sponsored information, and foreign nonnuclear information. Arranged under 39 categories, e.g., Biomedical sciences, basic studies; Biomedical sciences, applied studies; Health and safety; and Fusion energy. Entry gives bibliographical information and abstract. Corporate, author, subject, report number indexes.

Automotive Ethernet Nov 02 2020 Learn about the latest developments in Automotive Ethernet technology and implementation with this fully revised third edition. Including 20% new material and greater technical depth, coverage is expanded to include detailed explanations of the new PHY technologies 10BASE-T1S (including multidrop) and 2.5, 5, and 10GBASE-T1, discussion of EMC interference models, and description of the new TSN standards for automotive use. Featuring details of security concepts, an overview of power saving possibilities with Automotive Ethernet, and explanation of functional safety in the context of Automotive Ethernet. Additionally provides an overview of test strategies and main lessons learned. Industry pioneers share the technical and non-technical decisions that have led to the success of Automotive Ethernet, covering everything from electromagnetic requirements and physical layer technologies, QoS, and the use of VLANs, IP and service discovery, to network architecture and testing. The guide for engineers, technical managers and researchers designing components for in-car electronics, and those interested in the strategy of introducing a new technology.

Industrial Wireless Sensor Networks May 21 2022 Wireless sensor networks are penetrating our daily lives, and they are starting to be deployed even in an industrial environment. The research on such industrial wireless sensor networks (IWSNs) considers more stringent requirements of robustness, reliability, and timeliness in each network layer. This Special Issue presents the recent research result on industrial wireless sensor networks. Each paper in this Special Issue has unique contributions in the advancements of industrial wireless sensor network research and we expect each paper to promote the relevant research and the deployment of IWSNs.
