The Armenian People from Ancient to Modern Times Nov 01 2020 Edited by the leading historian of the Republic of Armenia, this is the definitive history of an extraordinary country - from its earliest foundations, through the Crusades, the resistance to Ottoman and Tsarist rule, the collapse of the independent state, its brief re-emergence after World War I, its subjugation by the Bolsheviks, and the establishment of the new Republic in 1991. Written by the foremost experts on each period in Armenia's history, this book is a major contribution to understanding the complexities of Transcaucasia. Armenia is a cradle of civilization situated on one of the world's most turbulent crossroads. This volume examines the question of Armenian origins and traces domestic and international relations, society and culture through the five dynastic periods, spanning nearly two thousand years. The challenge facing the Armenian people was to maintain as much freedom as possible under the shadow of powerful neighbouring empires. The adoption of Christianity had a permanent impact on the course of Armenian history and culture. These were the heroic, colourful and harsh feudal centuries of Armenia.

A Concise History of the Modern World Jul 10 2021 In an ever-shrinking world, the need for a global perspective in dealing with the modern world has become acute. This book attempts to provide such a perspective by investigating the major changes in geopolitics and world economy during the past 500 years. However compact, it enables us to understand the present unravelling of Communism and the growing challenge from Asia to Western Superiority. It is shown that in so many ways the problems of the contemporary world spring from the unprecedented era of western domination, which the non-western world is now trying to unlive.

A History of Education in Modern Times (Classic Reprint) Dec 23 2019 Excerpt from A History of Education in Modern Times More striking characteristics of the book will probably be found in the emphasis laid upon educational institutions and practices, rather than upon theoretical development; and in the larger place given to American education. The account of each educational movement has included at least an attempt to trace its influence upon the content, method, and organization of education in this country, while three chapters have been devoted exclusively to the rise of our educational system. For this somewhat special point of view, I trust that no apology is needed, as the book is intended primarily for use in the United States, and will be of service to our teachers largely as it succeeds in focusing the educational progress of this country. It will be quite possible, however, for those readers in England and other countries, who have been so hospitable in their reception of my former works, to neglect or curtail these parts of the book, and still have a body of material sufficient to represent satisfactorily the history of education during the past two centuries. Climate, History and the Modern World Jan 16 2022 We live in a world that is increasingly vulnerable to climatic shocks - affecting agriculture and industry, government and international trade, not to mention human health and happiness. Serious anxieties have been aroused by respected scientists warning of dire perils that could result from upsets of the climatic regime. In this internationally acclaimed book, Emeritus Professor Hubert Lamb examines what we know about climate, how the past record of climate can be reconstructed, the causes of climatic variation, and its impact on human affairs now and in the historical and prehistoric past. This 2nd Edition includes a new preface and postscript reviewing the wealth of literature to emerge in recent years, and discusses implications for a deeper understanding of the problems of future climatic fluctuations and forecasting.

Poland in the Modern World Mar 25 2020 Poland in the Modern World presents a history of the country from the late nineteenth century to the present, incorporating new perspectives from social and cultural history and positioning it in a broad global context Challenges traditional accounts Poland that tend to focus on national, political history, emphasizing the country's 'exceptionalism'. Presents a lively, multi-dimensional story, balancing coverage of high politics with discussion of social, cultural and economic changes, and their effects on individuals' daily lives. Explores both the regional diversity within Poland and the country's place within Europe and the wider world. Navies in Modern World History Jan 22 2020 "Navies in Modern World History traces the role of navies in world history from the early nineteenth century, through both World Wars, to the onset of the twenty-first century. Lawrence Sondhaus examines the navies of Britain, France, Germany, the United States, Japan, Brazil, Chile and the Soviet Union, demonstrating the variety of ways in which these countries have made decisive use of naval power, and the challenges these navies faced when assembling equipment and stores, training sailors, and undertaking various missions, and shows in what ways the results helped change the course of modern world history."

"This book also deals with aircraft carrier design and naval aviation in the second half of the twentieth century, and the leading role of navies and shipbuilders in key technological innovations of the nineteenth century and early twentieth, including advances in steam power, armour, guns and torpedoes. Today, technological breakthroughs are centred around naval stealth and maritime propulsion systems. Special attention is devoted to the evolving state of naval technology, showing how the relative industrial capabilities of seafaring countries have been reflected in their maritime building programmes, providing an important link between the evolution of modern national fleets and the broader history of the period." Cotton Jun 28 2020 Today's world textile and garment trade is valued at a staggering \$425 billion. We are told that under the pressure of increasing globalisation, it is India and China that are the new world manufacturing powerhouses. However, this is not a new phenomenon: until the industrial revolution, Asia manufactured great quantities of colourful printed cottons that were sold to places as far afield as Japan, West Africa and Europe. Cotton explores this earlier globalised economy and its transformation after 1750 as cotton led the way in the industrialisation of Europe. By the early nineteenth century, India, China and the Ottoman Empire switched from world producers to buyers of European cotton textiles, a position that they retained for over two hundred years. This is a fascinating and insightful story which ranges from Asian and European technologies and African slavery to cotton plantations in the Americas and consumer desires across the globe.

Turning Points in Modern Times Apr 06 2021 Turning Points in Modern Times focuses on events after 1917: the rise of Nazism on the Right and authoritarianism on the Left. Bracher provides an incisive framework for understanding the great ideological confrontation of this century--democracy versus totalitarianism in the forms of fascism, Nazism, and communism. His analysis of the outcomes underscores the significance and power of democratic values and governments. The doyen of German political history, Karl Dietrich Bracher extends the argument against dictatorship that runs through his life's work, offers a blueprint for dealing with the recent past of the communist East German State (DDR), looks at the true facts of the Stasi collaboration, and challenges misperceptions of Hitler, Stalin, and others. He demonstrates the kinship between fascism and communism, considers Weimar and liberalism, assesses the legacy of Nazism, and outlines the ethos of democracy. In all this Bracher exposes the twentieth-century threats to the democratic state so that they can never again subvert representative government. A founder of the new history of Germany, which considers the larger context for Hitler and illuminates events through the theories of social science and the values of liberalism and democracy, Bracher writes in the tradition of Acton, Burckhardt, Croce, and Dahrendorf. This is a vital history lesson for our turbulent times, when once more democracy is on the march after a twilight century.

A Cultural History of the Modern Age Sep 11 2021 Volume three of A Cultural History of the Modern Age finishes a journey that begins with Descartes in the first volume and ends with Freud and the psychoanalytical movement in the third volume. Friedell describes the contents of these books as a series of performances, starting with the birth of the man of the Modern Age, followed by flowering of this epoch, and concludes with the death of the Modern Age. This huge landscape provides an intertwining of the material and the cultural, the civil and the military, from the high points of creative flowering in Europe to death and emptiness. The themes convey multiple messages: romanticism and liberalism opens the cultural scene, encased in a movement from The Congress of Vienna and its claims of peaceful co-existence to the Franco-German War. The final segment covers the period from Bismarck's generation to World War I. In each instance, the quotidian life of struggle, racial, religious, and social class is seen through the lens of the mighty figures of the period. The works of the period's great figures are shown in the new light of the human search for symbolism, the search for superman, the rise of individualism and decline of history as a source for knowledge. This third volume is painted in dark colors, a foreboding of the world that was to come, of political extremes, and intellectual exaggerations. The author looks forward to a postmodern Europe in which there is a faint glean of light from the other side. What actually appeared was the glare of Nazism and Communism, each claiming the future.

Socrates Jan 28 2023 A brilliant portrait of the Greek philosopher who personified philosophy. Socrates was undeniably one of the greatest thinkers of all time, yet he wrote nothing. Throughout his life, and indeed until his very last moment alive, Socrates fully embodied his philosophy in thought and deed. It is through the story of his life that we can fully grasp his powerful actions and ideas. In his highly acclaimed style, historian Paul Johnson masterfully disentangles centuries of scarce sources to offer a riveting account of a homely but charismatic middle-class man living in Athens in the fifth century b.c., and how what this man thought still shapes the way we decide how to act, and how we fathom the notion of body and soul. Johnson provides a compelling picture of the city and people Socrates reciprocally delighted in, as well as many enlightening and intimate analyses of specific aspects of his personality. Enchantingly portraying "the sheer power of Socrates's mind, and its unique combination of steel, subtlety, and frivolity," Paul Johnson captures the vast and intriguing life of a man who did nothing less than supply the basic apparatus of the human mind.

Timelines Dec 03 2020 War and revolution, economic crises and political conflict are the very stuff of modern history. This guide to the last 100 years of great power conflict, social rebellion, strikes and protests gives us the essential history of the world in which we live. Based on the Timeline TV series this is a rapid and accessible guide for those who want to know how power is exercised, by who, and for what purposes in the modern world. From the rise and fall of great empires in two world wars, the Cold War and the 'war on terror' through to the rise of China Timelines describes the shifts in the imperial structure of the world. And it looks at the impact of those changes in the conflict zones of the 21st century, including Afghanistan, Iraq and Iran. Finally Timelines looks at moments of popular resistance, from the Russian and Spanish revolutions to the fall of Apartheid in the 1990s and the ongoing socialist experiment that is Hugo Chavez's Venezuela. We live in turbulent times. These essays show us how we got here and outline the forces that are going to shape the history of the 21st century.
